Empty weight: ~2500kg

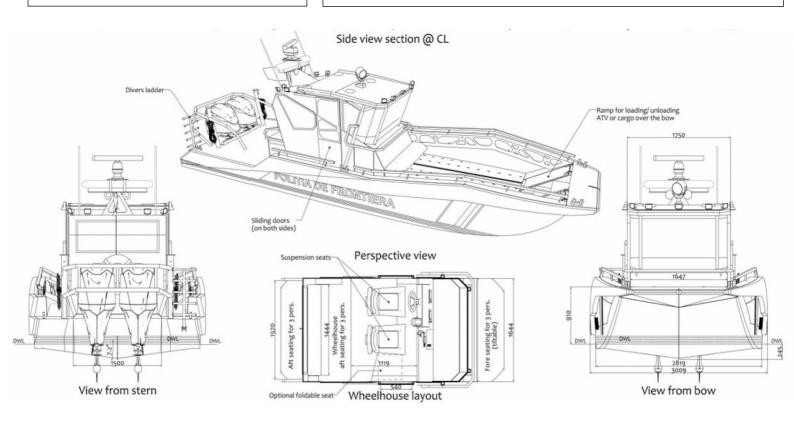

Material: Aluminium EN AW 5083 H111

CE certified: C category vessel

LR 10 PATROL

This boat is designed to be used on rivers or lakes as a patrol or rescue boat. The hull design of LR10 patrol gives you access to areas with shallow water thanks to the low draft. The stern of the vessel is without guardrails and flat, making the vessel a capable rescue boat. The bow of the vessel has a large open area for transporting different cargo or an ATV. Cabin fits comfortably 4 passengers while there is more seating provided around the cabin. In total the vessel can transport 9 passengers and a 2-person crew. It is a very stable and safe vessel which can also achieve great speeds on rivers and lakes. With the power of two 300 horsepower

outboard motors the boat maximum speed is 50 knots.
